Why Sunmight Ceramic Abrasives?

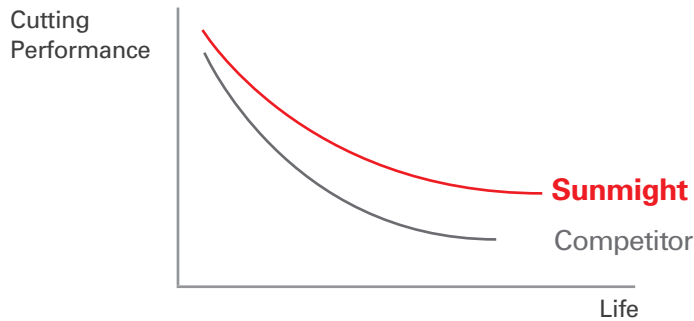

Sunmight Ceramic Grain Abrasives are designed with self-sharpening ceramic grains and specialized resin to deliver faster cutting and longer lifespan, and they are precisely designed to meet the exact demands of each job.

Application

Case Study

Sunmight ceramic grain abrasives outperform competitors, delivering superior grinding performance and extend lifespan with the innovative coating and resin technology.

Product	P979S	
Application	Investment casting	STS tank
Material	Stainless steel, Carbon steel	Stainless steel
Work method	Off-hand	Robot
Grit size	#36, 40	#36~80
Wet or Dry	Dry	Dry
Advantage	- Outlasts the competition by 30% - Reduced initial pressure needed	

Ceramic Grain Abrasives Series

P979S

- Y'wt ceramic grain product for stainless steel, carbon steel, titanium, alloy
- High performance grinding thanks to special coating
- Long life span thanks to self-sharpening grains and stronger backing

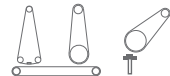

P963S

- X'wt ceramic grain product for stainless steel, carbon steel, titanium, alloy
- High performance grinding
- Good for specialty products

P926

- X'wt ceramic grain product for wood(Hard wood, maple, oak), aluminium and soft metals
- High performance grinding
- Ideal for light-pressure applications

R970

- For fast cut on Titanium, stainless steel, aluminium, brass, nickel, cobalt, chrome and other soft metals
- Flexible product for polishing contoured parts
- Ideal for light-pressure applications

R755

- For flap disc
- Used for stainless steel, alloy and carbon steel
- High performance grinding
- Poly-cotton backing with ceramic grain
